

PRESS RELEASE 5/6/14

Ortho Kinematics' VMA Technology Demonstrates Revolutionary Advancements in Spine Diagnostic Testing

VMA diagnostic technology demonstrates improved repeatability and precision

AUSTIN, Texas – May 6, 2014 — Ortho Kinematics, Inc. (OKI), a privately held healthcare diagnostic company focused on spine imaging informatics, demonstrates superior advancements in the reliability and precision of spine diagnostic testing through its VMA technology.

The recent publication can be found at the following link

<http://www.sciencedirect.com/science/article/pii/S1529943013016574>

The paper concluded that “The VMA system markedly reduced variability of lumbar intervertebral measurements compared with a digitized manual analysis. Further, computer-assisted fluoroscopic imaging techniques demonstrate precision within the range of computer-assisted X-ray analysis techniques.”

"The Ortho Kinematics VMA test has changed the way I evaluate lumbar and cervical radiographs. The spinal journal article reiterates my assertions that controlled motion bending and computerized imaging processes substantially increases the precision of the data I rely on for evaluating flexion extension X-rays." - David Lee, MD. "The recent paper published by Yeager et al. in The Spine Journal reports the improved reliability in the VMA intervertebral measurements compared to the traditional methods. This is an additional peer reviewed publication that supports the efficacy of the VMA technology." said Paul Gunnoe, CEO of Ortho Kinematics, Inc.

OKI's Vertebral Motion Analysis (VMA) test is a revolutionary new diagnostic technology that is an alternative to a test that has been routinely prescribed for the assessment of spinal instability for over 70 years. Spinal instability is a condition that very often results in severe back and neck pain, and is the number one most common primary diagnosis driving the 500,000+ spine fusion surgeries done in the US each year.

Visit www.orthokinematics.com for more information about the VMA and to locate the closest facility.

About Ortho Kinematics

Ortho Kinematics is a privately held diagnostic technology company, focused on spine imaging informatics and committed to the idea that spine motion matters. The company is working with a group of leading clinicians, researchers and developers who are passionate about leveraging spine biomechanical data to improve the diagnosis and treatment of back pain. Ortho Kinematics is located in Austin, Texas and is on
